

TEHNI

The door specialists

ALS

TLS DOORS

Mastery in Every Detail. Excellence in Every Entrance.

TLS Doors represents the pinnacle of Tehni's nearly four decades of expertise in high-end aluminum engineering. More than just a collection of entrances, TLS is the embodiment of our "Precision in every detail" philosophy.

Born in our state-of-the-art facility in Xanthi, Greece, these systems combine advanced robotic glass cutting and CNC precision with a commitment to craftsmanship.

From the textured luxury of the Mystique collection to the minimalist rigor of the Black Line and the high-thermal performance of the TLS 90 Multilayer, our doors are engineered to exceed international standards in security (RC2/RC3) and energy efficiency (Ud 0.82).

TLS Doors are not merely functional components, they are secure, elegant, and durable architectural statements designed to define the first impression of every home.

PIONEERING THE INDUSTRY

Innovative Growth Since 1988

Founded in 1988 in Xanthi by Aristides Pantelos, TEHNI S.A. has expanded its operations to a 20,000 square metre facility.

Specialising in the construction of **entrance doors, aluminium, PVC panels** and **anti-mosquito systems**, the company has become a leading force in the Greek aluminium sector.

With continuous investment, TEHNI boasts state-of-the-art automation, including laser metal cutting, robotic glass cutting, CNC pantographing and multiple powder coating lines.

TLS 90 Multilayer

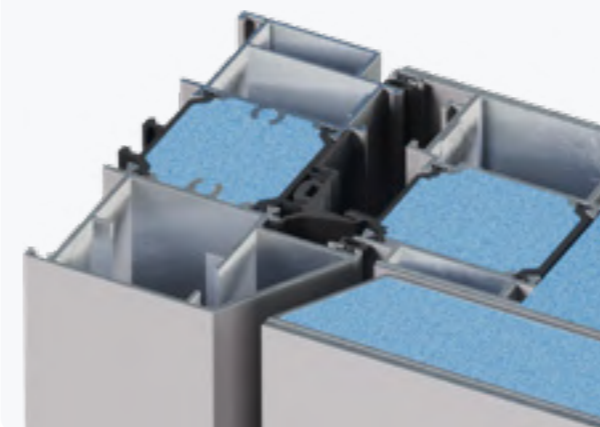

Engineered for superior thermal performance, it delivers exceptional energy efficiency and reliable security, making it ideal for projects where maximum insulation and comfort are top priorities.

Progettato per garantire prestazioni termiche superiori, offre un'efficienza energetica eccezionale e una sicurezza affidabile, rendendolo ideale per progetti in cui il massimo isolamento e il comfort sono priorità assolute.

Es wurde für eine hervorragende Wärmeleistung entwickelt und bietet eine außergewöhnliche Energieeffizienz und zuverlässige Sicherheit. Damit eignet es sich ideal für Projekte, bei denen maximale Isolierung und Komfort oberste Priorität haben.

Conçu pour offrir des performances thermiques supérieures, il garantit une efficacité énergétique exceptionnelle et une sécurité fiable, ce qui le rend idéal pour les projets où une isolation et un confort maximaux sont des priorités absolues.

Design
Specifications

A photograph of a modern, single-story house. The house features a mix of materials: a prominent wall of rough-hewn, light-colored stone on the left, and smooth, white stucco for the rest of the exterior. The architecture is minimalist with clean lines and flat surfaces. A large, double-door entrance is made of vertical wood planks with a dark, vertical handle. There are several windows, including a small, square window above the door and a larger window to the right. The house is surrounded by some greenery and a concrete walkway leads to the entrance. The sky is clear and blue.

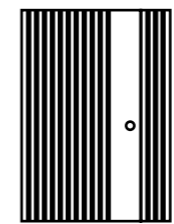

Nature's strength,
refined by design.

Standard Configuration

Our Standard Configuration offers a perfect balance of strength, efficiency, and refined design, ensuring comfort, protection, and lasting performance.

1. GU Lock

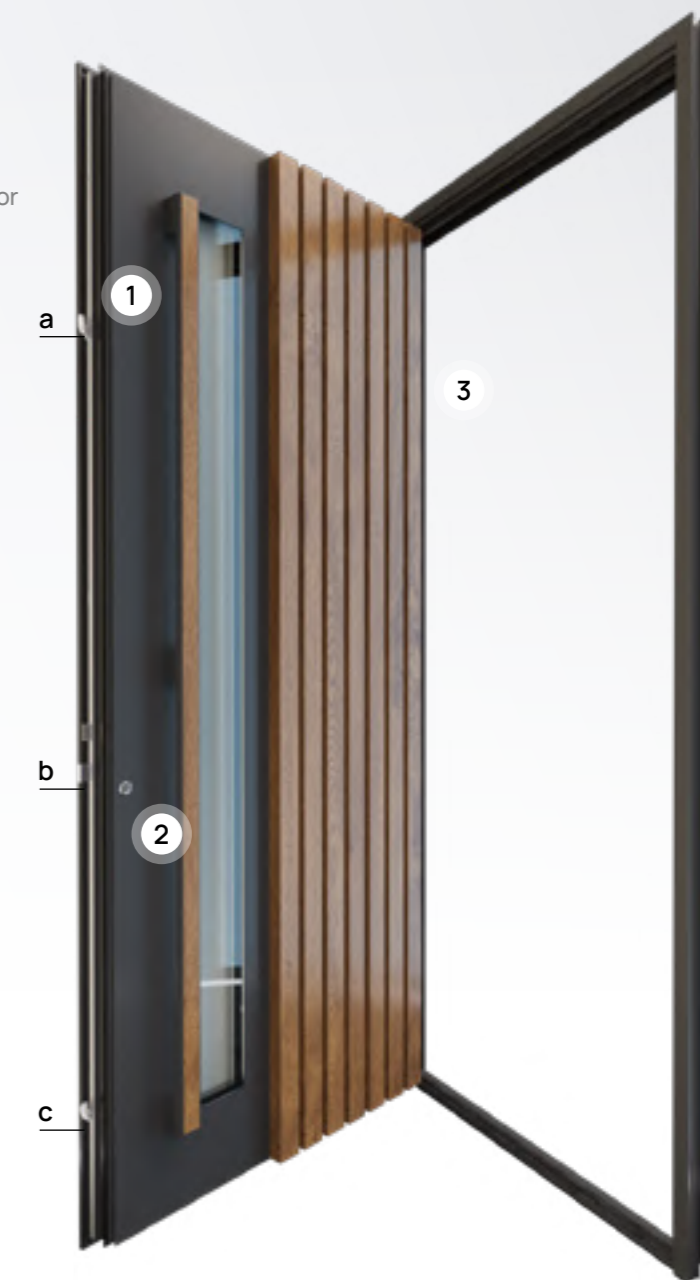

This 3-point hook system anchors the door securely at multiple levels. It provides superior break-in resistance and ensures a tight seal.

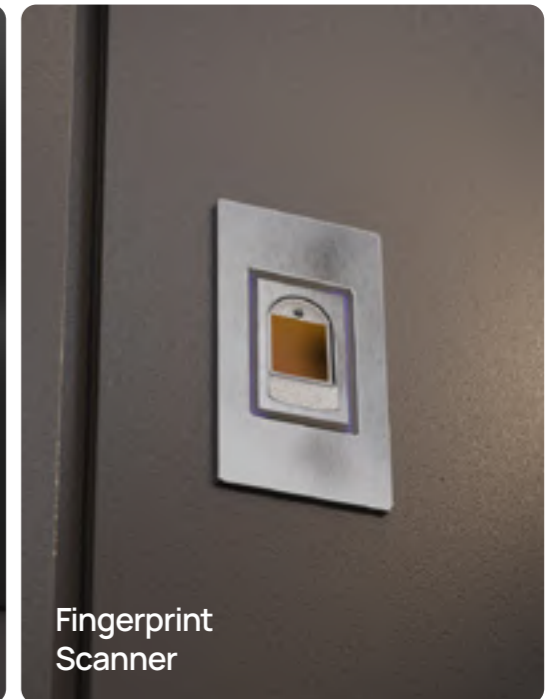

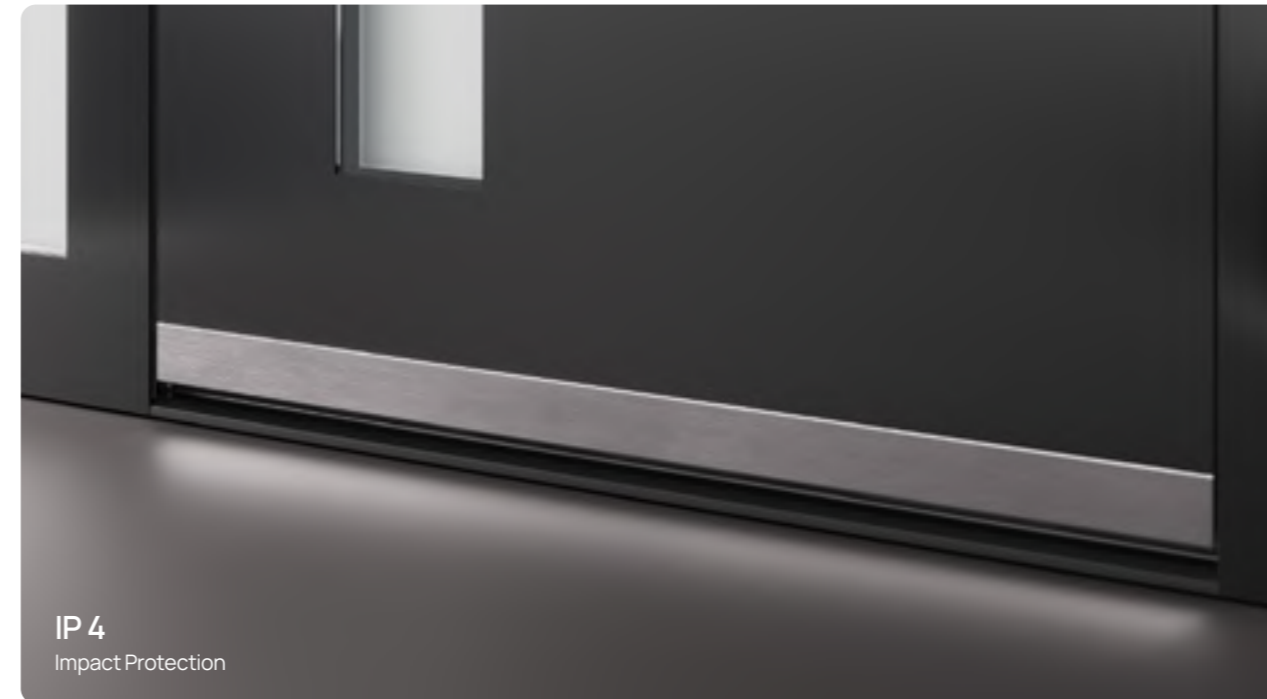

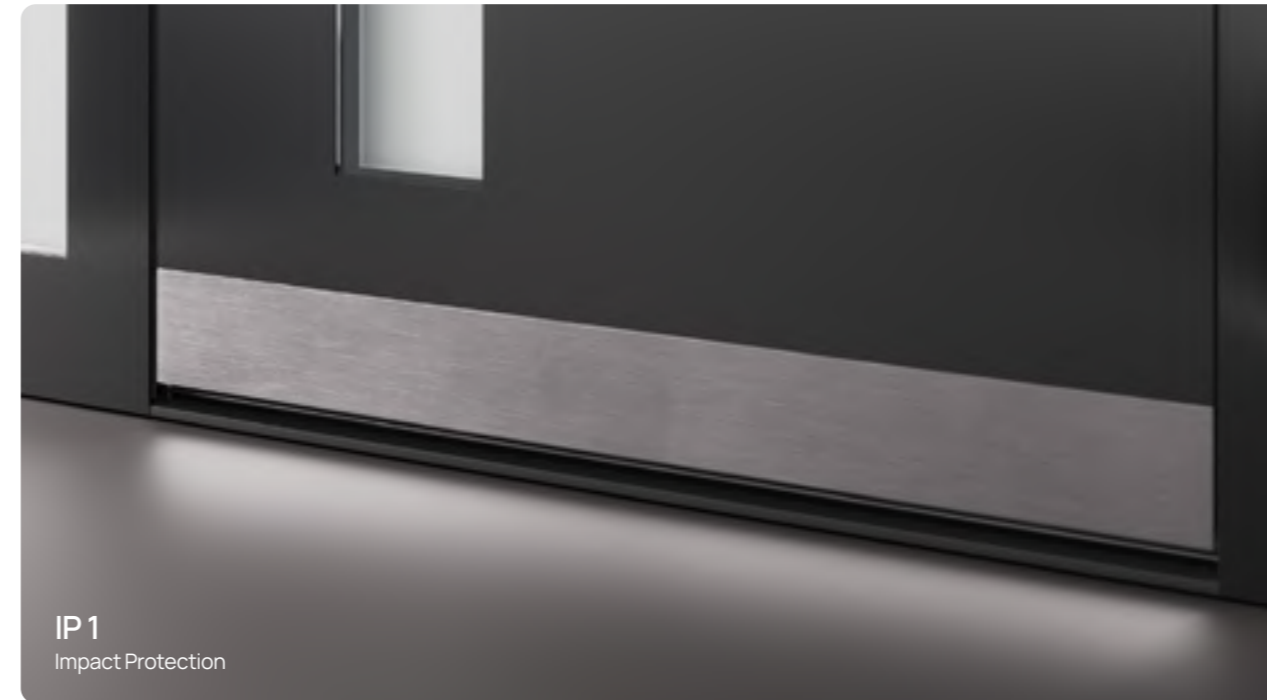

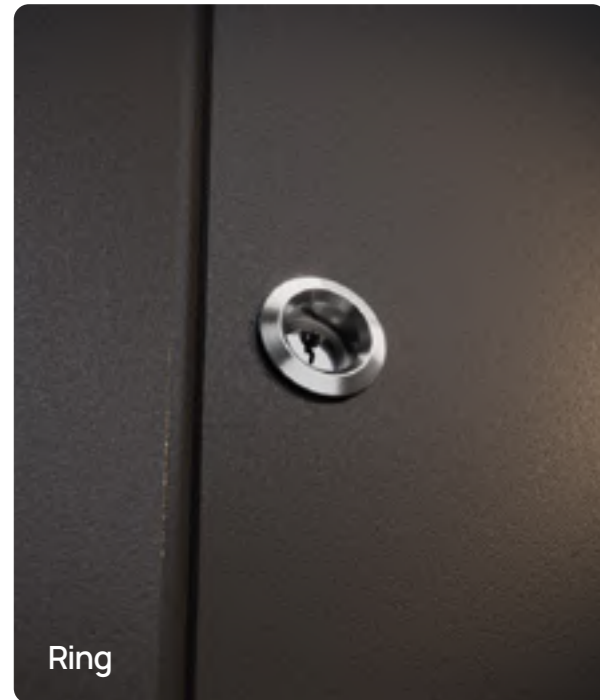

2. Cylinder

A reinforced housing that protects the lock core from tampering. It offers a sleek finish while shielding the cylinder.

3. Hinge

Engineered for heavy loads, these hinges ensure smooth and silent door movement. They are fully adjustable to maintain perfect alignment for years to come.
